WORK EXPERIENCE

Trentium Solution
1 June 2025 – Present

AI ML Engineer I

- Built AI-powered review management features for GMB Pro (Google Business Profile management).
- Implemented AI-generated context-aware replies and Magic QR code functionality.
- Significantly improved customer engagement and automated review intelligence workflows.

BISAG - N (Bhaskaracharya National Institute for Space Applications and Geo-informatics)
1 Jan, 2025 – 30 April, 2025

AI ML Internship

- Built an AI-powered chatbot to query and answer questions across multiple PDF documents.
- Used Retrieval-Augmented Generation (RAG), vector embeddings, and semantic similarity search.
- Delivered context-aware responses with a fast, interactive chat interface.

Sahana System Limited
20th June, 2024 – 5th August, 2024

AI ML Internship

- Gained hands-on experience in end-to-end ML model development from preprocessing to model evaluation.
- Implemented supervised and unsupervised learning algorithms using Python, Scikit-learn, Pandas, and NumPy.
- Collaborated with senior engineering mentors to adopt production AI/ML deployment workflows.

PROJECTS

Agentic AI Customer Support System
Python, LLMs, LangChain, RAG, FastAPI

- Developed an Agentic AI system to automate customer query analysis, information retrieval, and response generation.
- Built multi-agent AI workflows using LLMs, RAG, and Python to provide context-aware, verifiable answers.
- Integrated APIs to automate repetitive support tickets and enhance business decision-making.

PDF RAG Chatbot
LangChain, Vector Search, Embeddings, Streamlit

- Developed an AI-powered conversational application enabling multi-document PDF uploads and instant semantic querying.
- Constructed an end-to-end RAG pipeline utilizing text chunking, vector embeddings, and top-k similarity search.
- Guaranteed context-grounded responses strictly tied to uploaded source document knowledge.

House Price Prediction
Scikit-learn, Pandas, NumPy, Regression

- Developed a regression-based machine learning model to predict real estate valuation using location, square footage, and amenities.
- Conducted comprehensive data cleaning, outlier treatment, feature engineering, and cross-validation to maximize accuracy.

EDUCATION

Bachelor of Technology - IT Software Engineering
2023 – 2026

Gandhinagar University | CGPA: 8.23

Diploma in Engineering
2020 – 2023

Government Polytechnic Himatnagar | CGPA: 8.35

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Data Analytics, Data Science

Machine Learning & NLP: Scikit-learn, Supervised/Unsupervised Learning, Regression, NLP

Generative AI: Large Language Models (LLMs), RAG, LangChain, Embeddings, Vector Search

Backend & Tools: FastAPI, Git & GitHub, Model Deployment, Streamlit
